

Chess (Double Version)

Initial View of the Chess Board

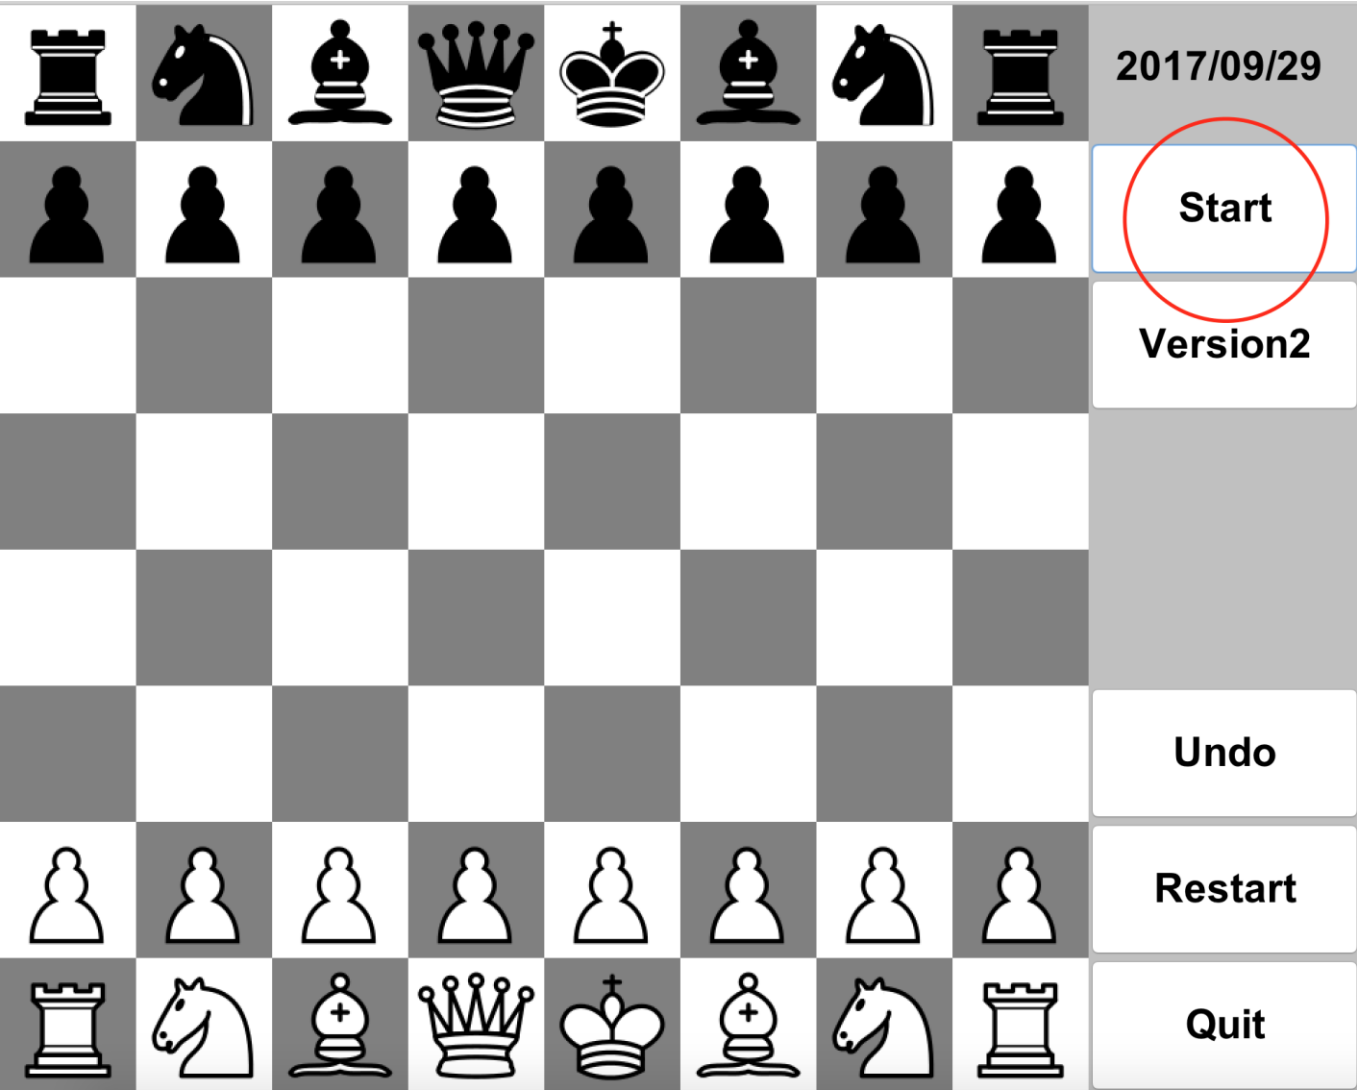

When the game is opened, the user will see the following interface, which is the initial state of the game.

Start

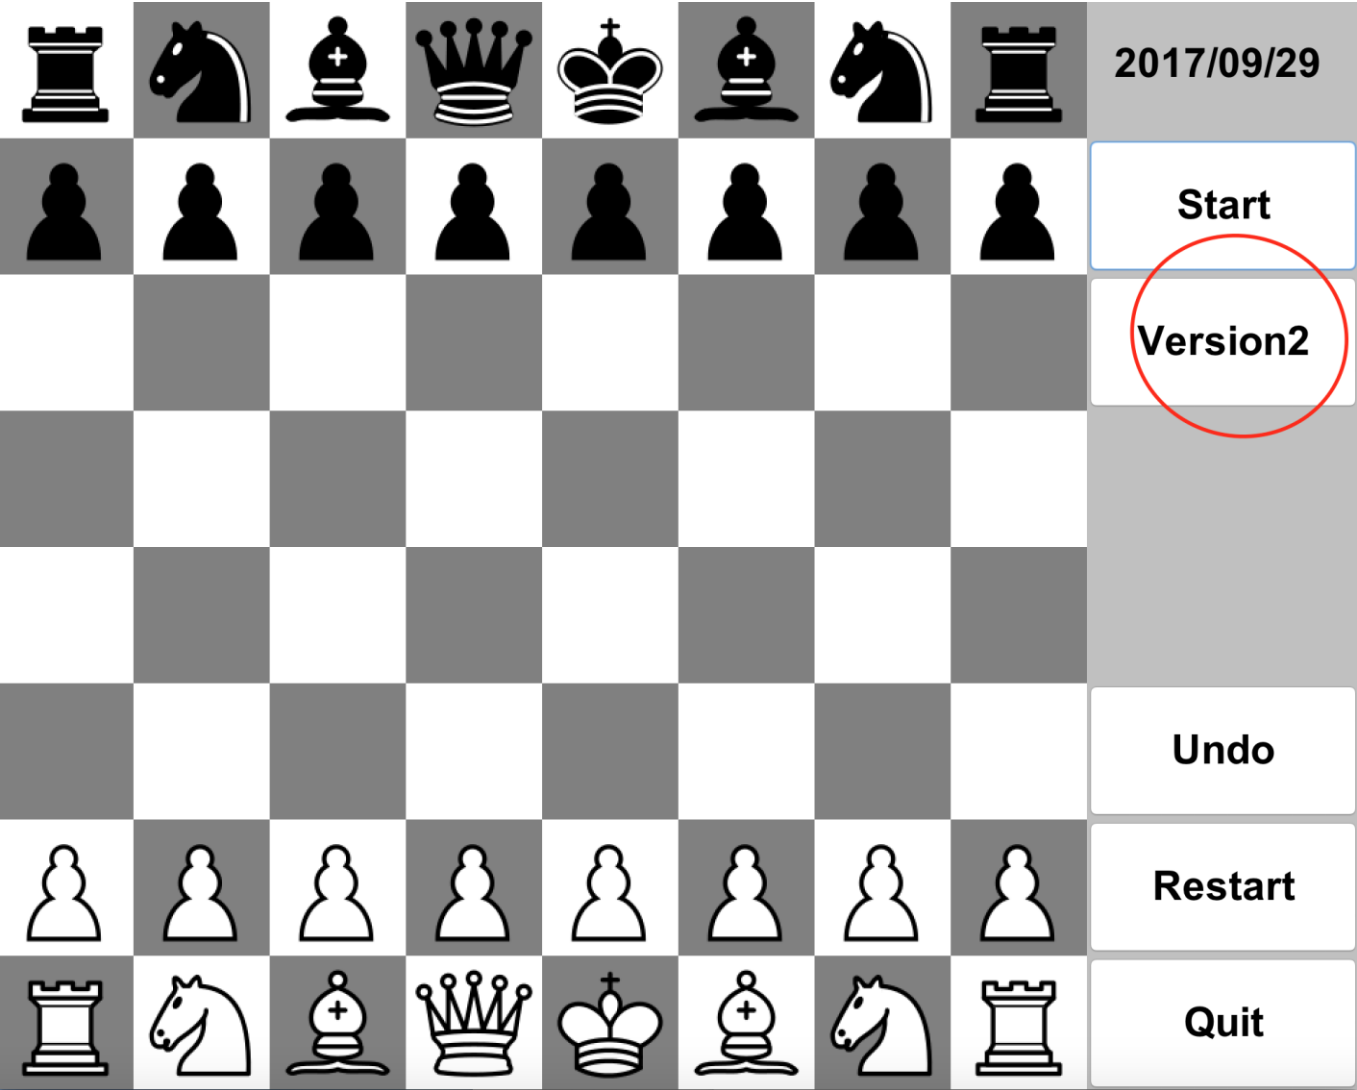

To start the game, click the “Start” button.

This will allow users to play the classic version of the chess.

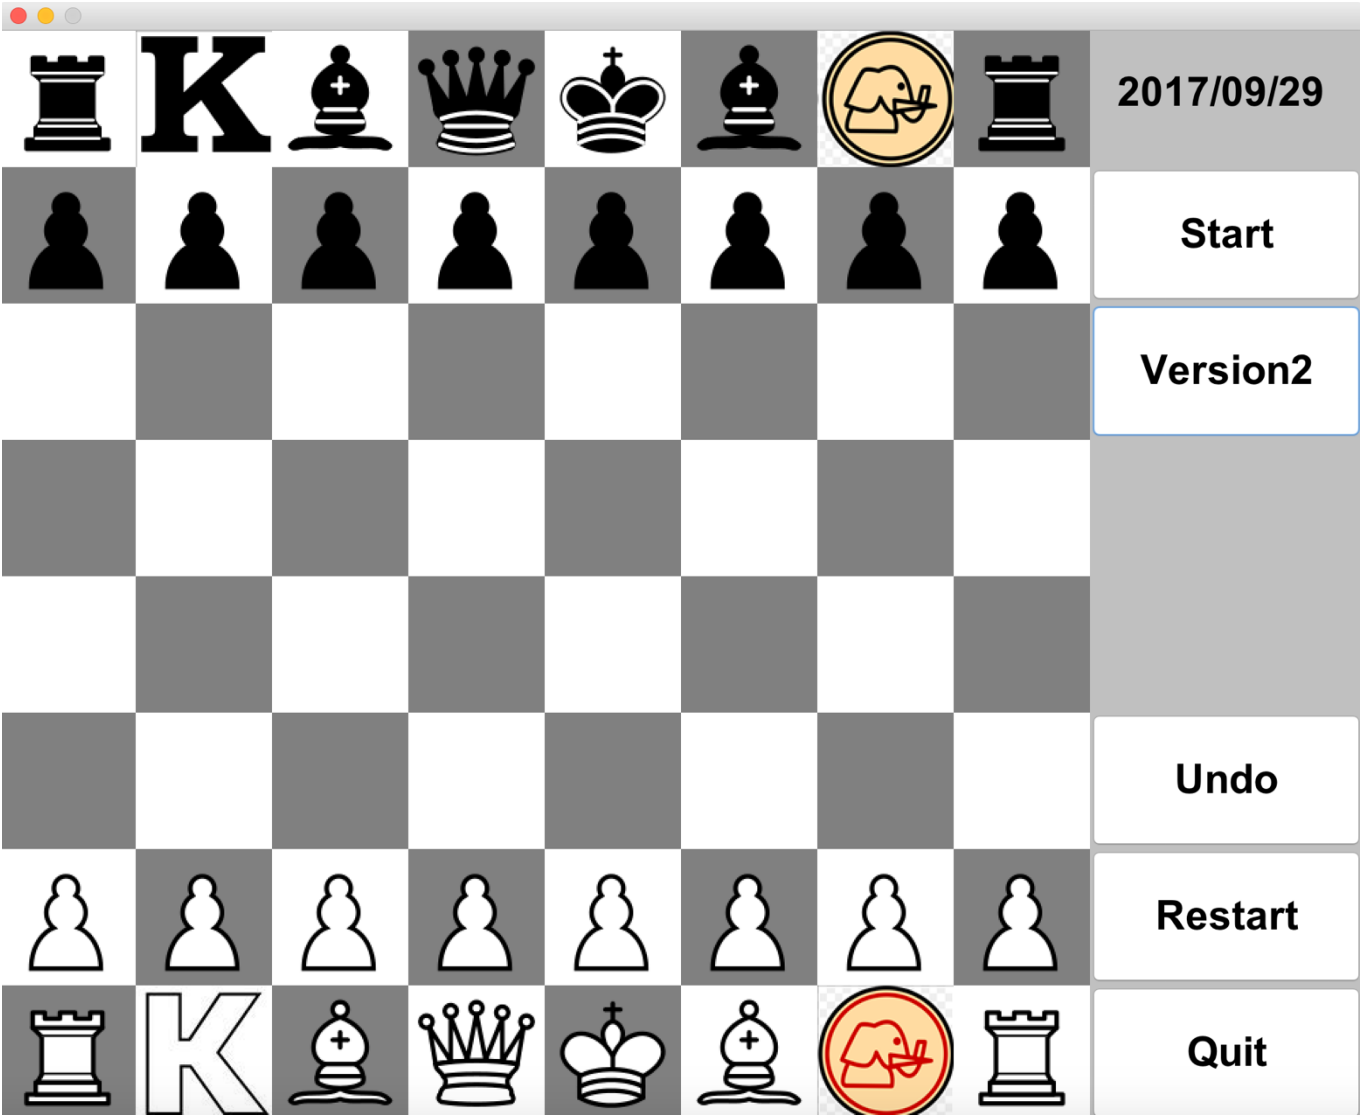

Change Version

To change the version of the game, click the “Version2” button. Then to start the game, click the “Start” button.

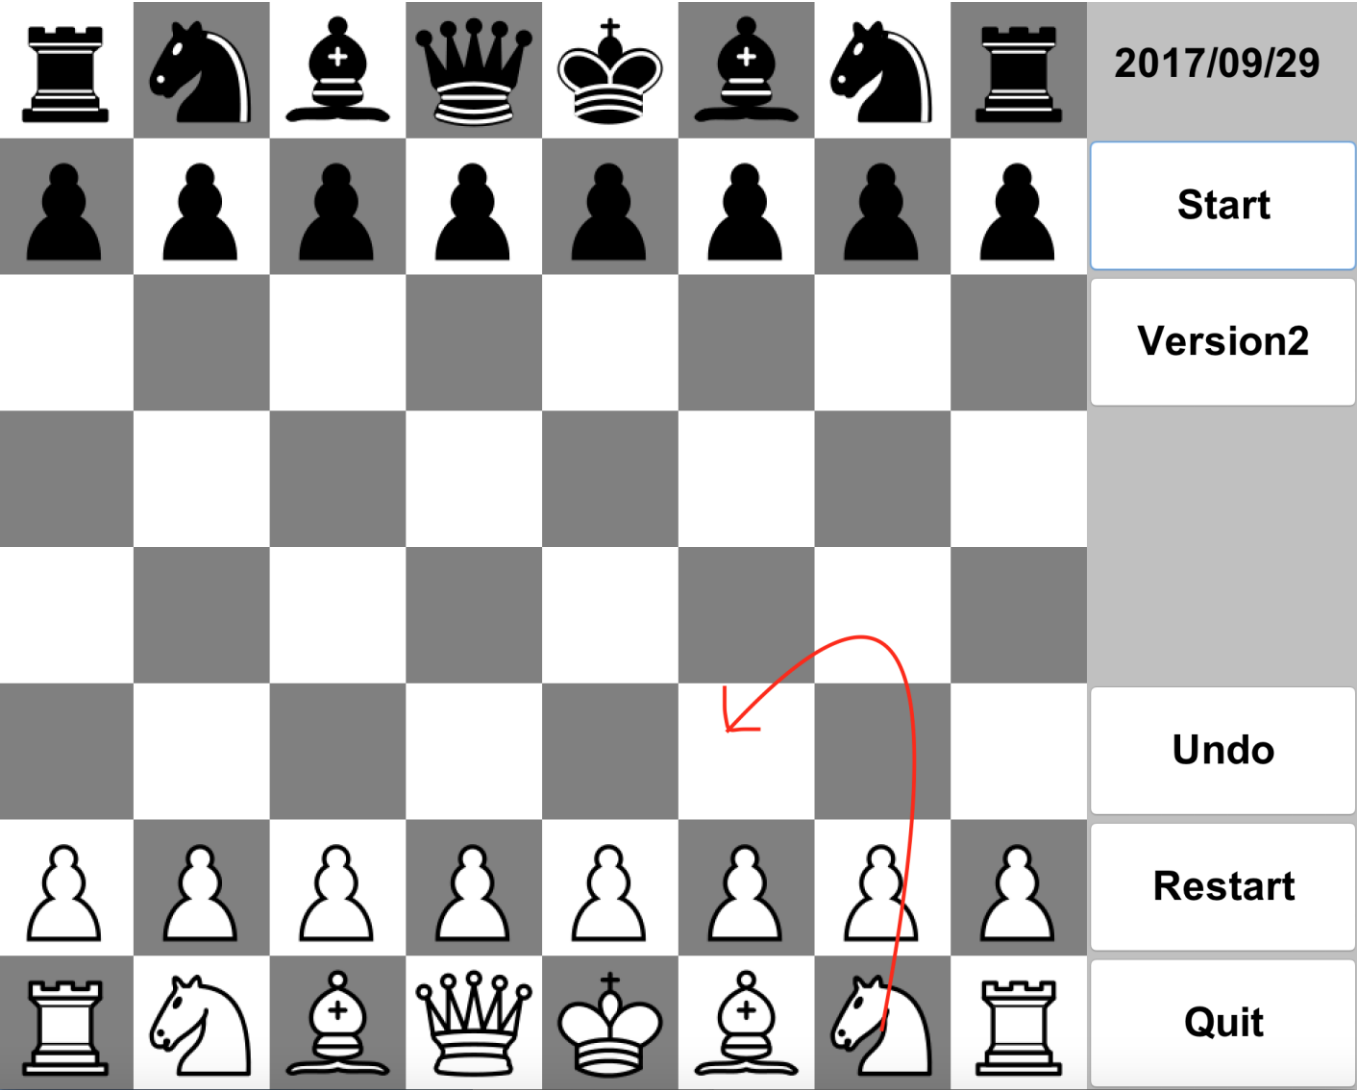

The new version will look like this:

Move

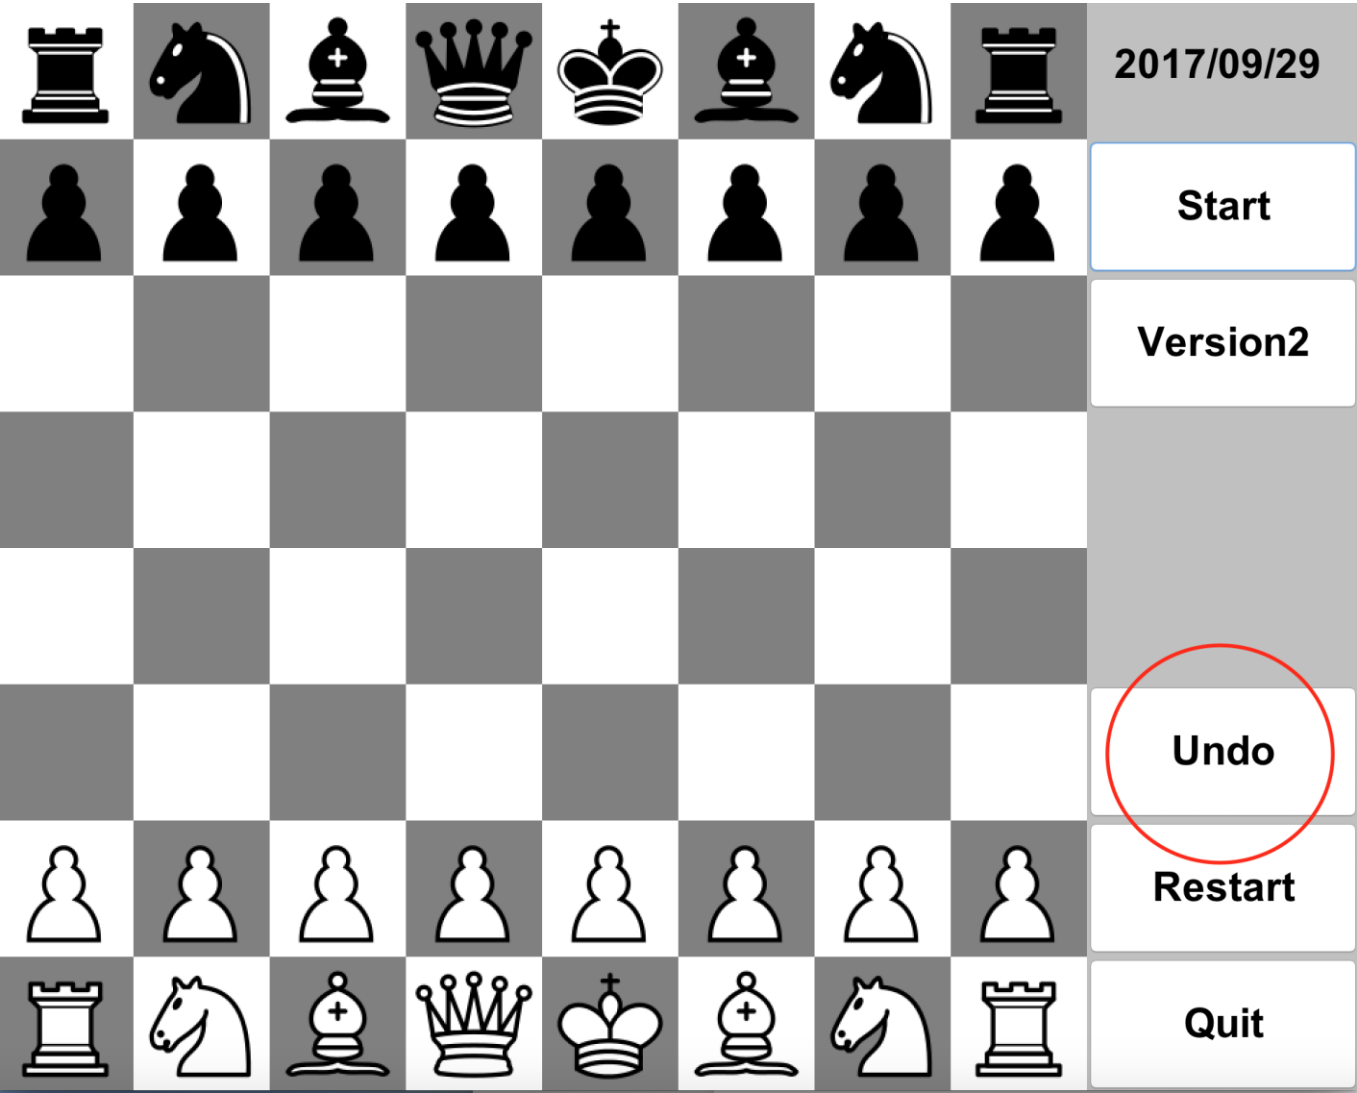

To move the piece, press the mouse at the current location of the piece and drag it to the target place, then release the mouse.

Undo

To return the previous state, click the “Undo” button.

The player can return to the initial state.

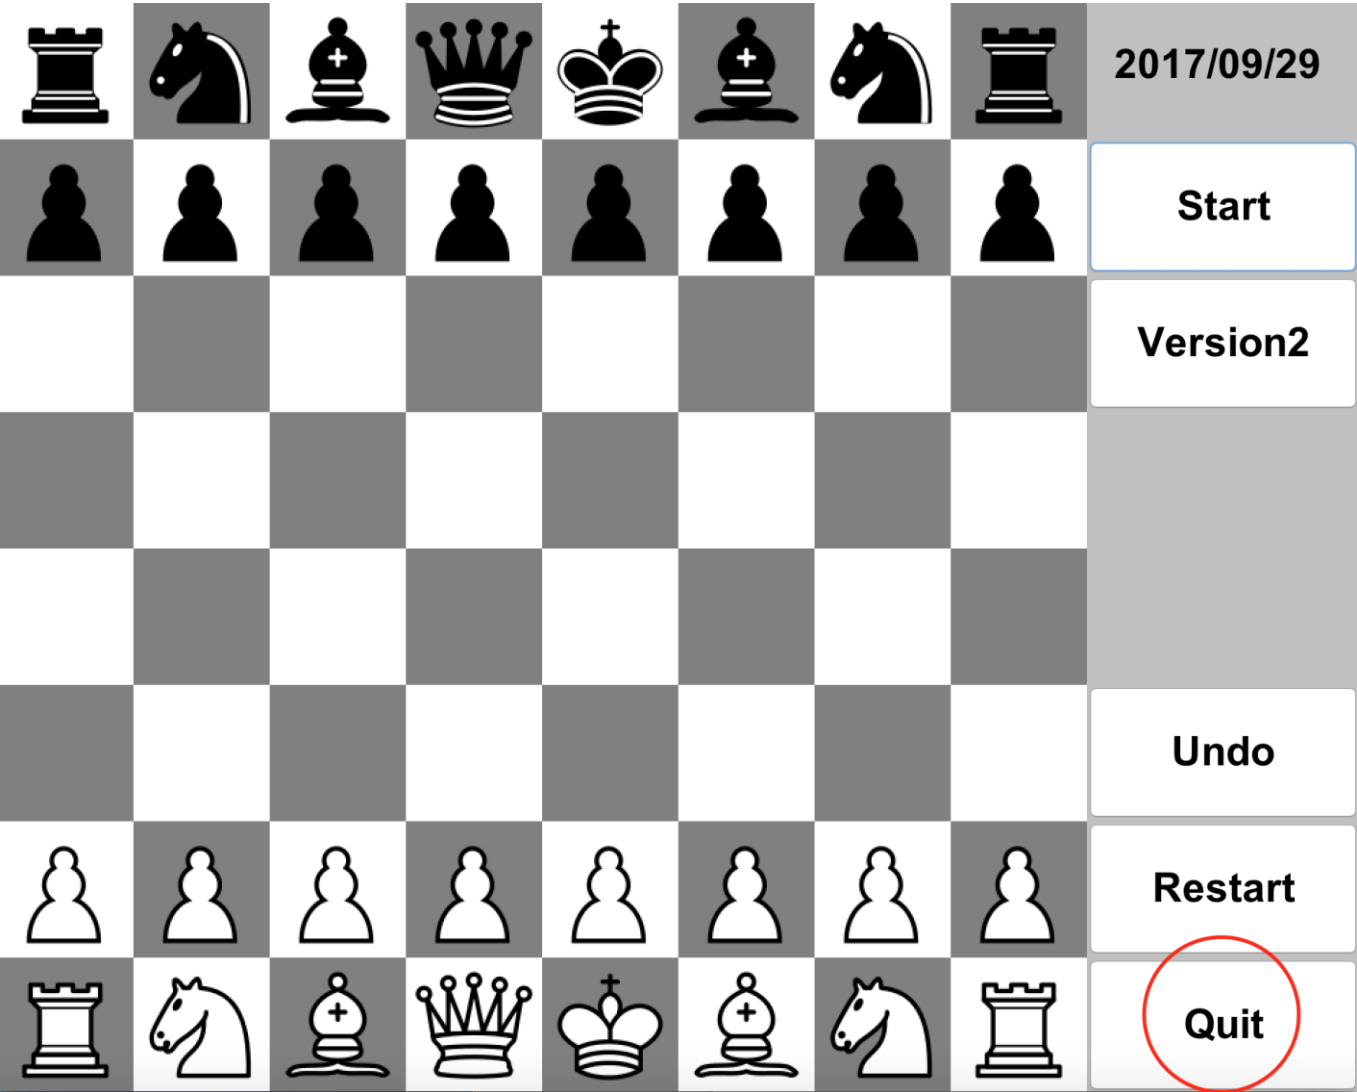

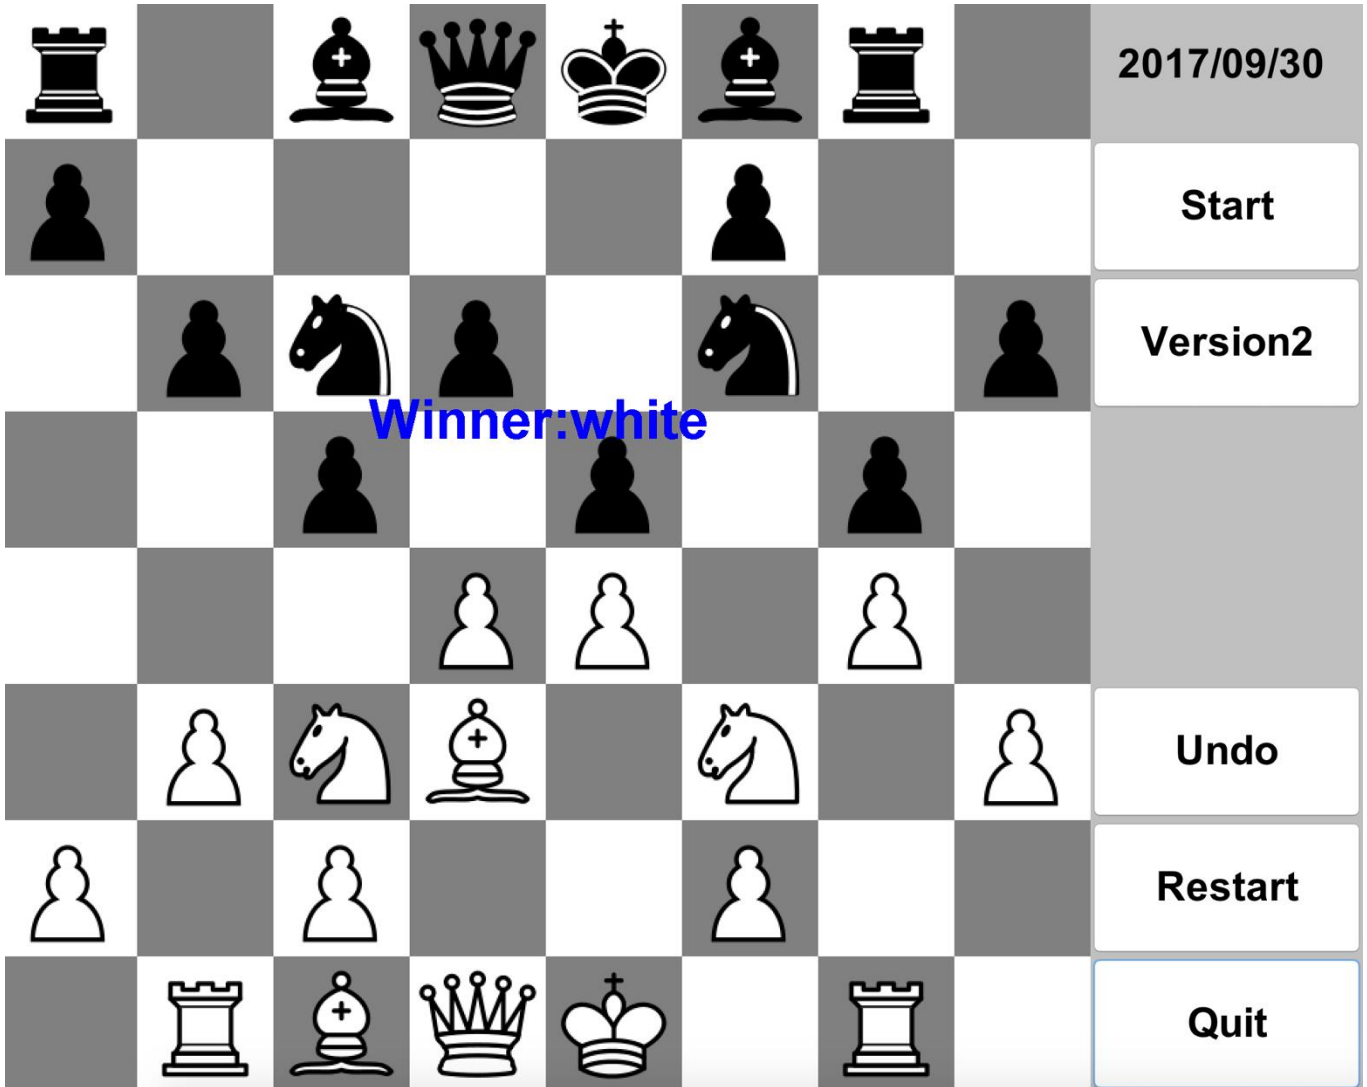

Quit

To quit the game, click the “Quit” button.

The player can quit at any time.

The player clicking the “Quit” button will lose the game.

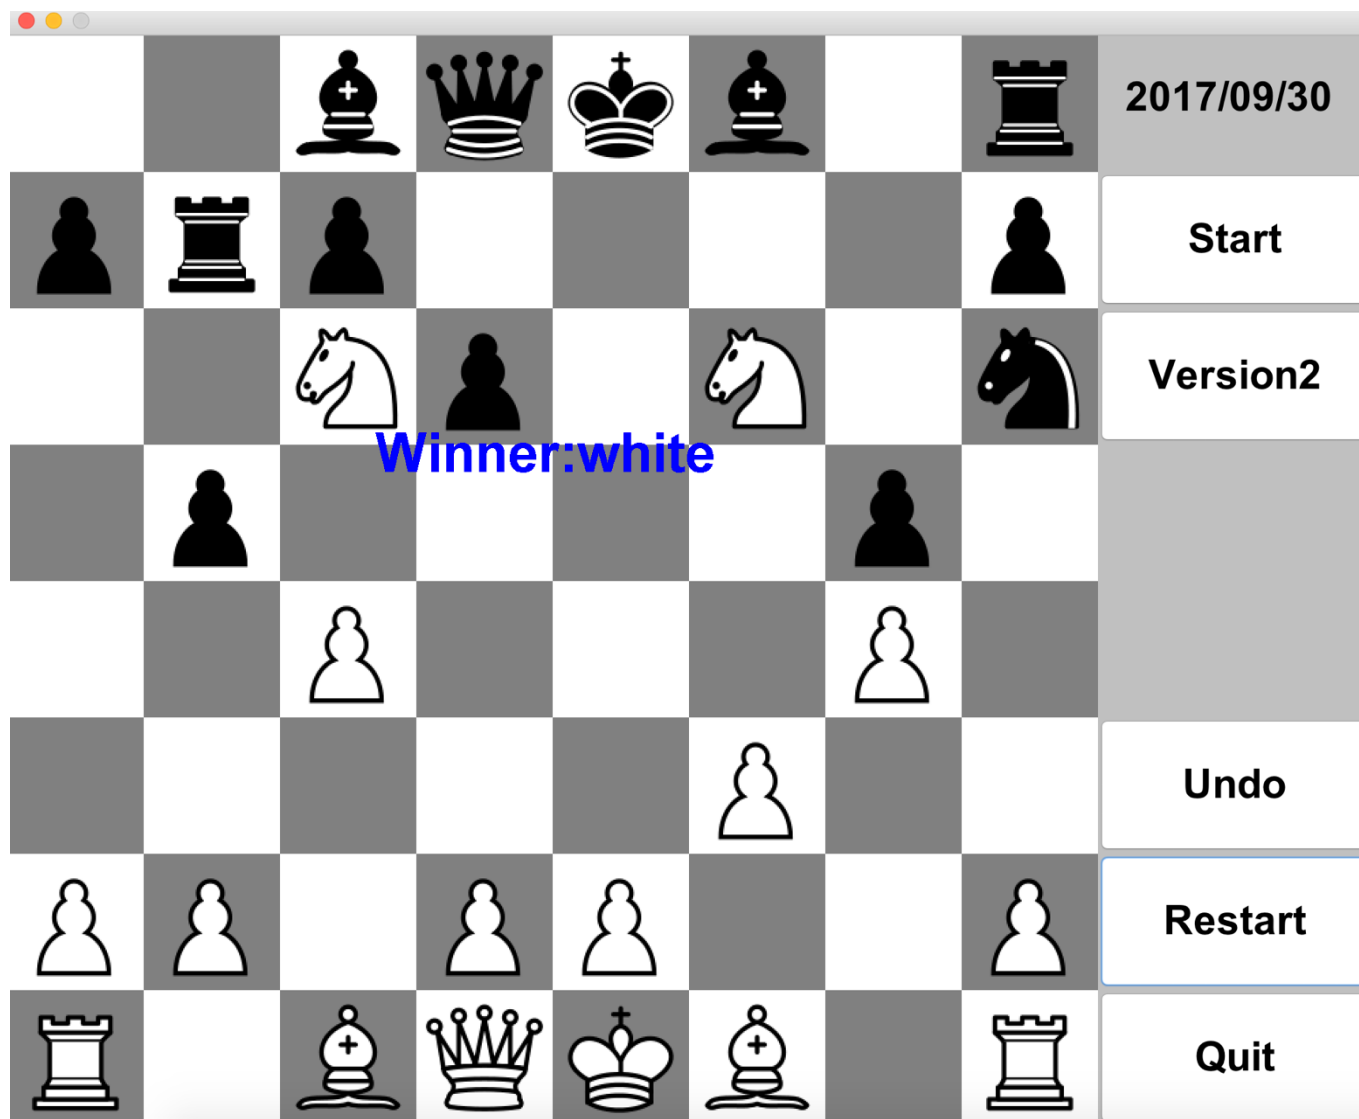

Game End

If a player is in check, then the player needs to react. After moving the piece, if the player is still in check, then the game will end.
